## Why we have an education day

In today's fast paced and scientific Filled word, our young people do not get the chance to experience a much slower time. A time without radio, TV, or a push button existence. In schools today, if it is taught, they learn about our history in the third grade and again maybe in the eighth grade. This history is learned through a book; cold and sterile, straight forward without the feel, smell or a human touch.

When children come to our event on Education Day, they get to see history as it was and experience it as it was meant to be. Now, for the first time, what they were taught in class and read in a book comes alive.
